# Rating Solutions Instec

Kevin Mason, EVP Solutions

# About Instec

- 130 employees – all U.S. based
- Headquartered in Naperville, IL
- In business 33 years
- \$20M in annual revenue
- Serving over 30 direct licensed clients
  - Supporting over 200 subsequent entities using Quicksolver
- Commitment to continuous improvement in both products & services
- No legacy – no clients left behind on obsolete technology
- 100% implementation success rate

For more than 30 years, Instec has been staunchly committed to arming insurers, general agents, and underwriters with the speed and agility they need to get and remain competitive, in any marketplace.

# Commercial insurance: Darwinian economy

- Carriers balance sheets underleveraged
- New players & the demands of capital
  - Reinsurance, foreign entities, non-traditional investment vehicles, Wall Street, etc.
- New paradigms & disruption
  - Driverless cars, drones, cyber, aggregators, technology advancements, generational changes/demands/expectations

# Competitive advantage – Sustainable?

- Speed to market is critical in times of disruption
  - Books move, appetites change, distribution shifts, and you have to be able to react
- Investments to be calibrated to the opportunity because of uncertainty
  - No desire for large IT investments
- Commitments to business are needed which require certainty
  - Many constituencies involved in a major business decision, and technology must be an enabler

# The new value proposition for Policy Admin

Value Prop	Drivers	Proof Point
Speed to market	Working content out of the box Cloud based delivery Configuration by business users High reuse	Program carrier leverages cloud-deployment to quickly capture \$60M program before others could act – in 8 weeks
Low cost of entry	Usage based pricing Contracts that are not front loaded	Start-up program moving from broker to PA – needed system to accommodate fronting company – 10 weeks
Reliability	Working content out of the box High reuse Architecture that accommodates change	Program carrier wants to capture new program, but neither have a system, proof of concept to production in under 3 months
